

# Break Down the Walls

Skarhead

The gray wall saving who from who?  
Unsung hero's killed going through  
In the shadow of the wall another one dares  
Twenty five years of nightmares  
It's gotta stop (stop, take it or leave it)  
It's a symbol of war (we don't want it)  
Break it up (now)  
Can't they see, there's no life behind closed doors

(We don't need no) and we don't need no  
(Fallen hero's) fallen hero's  
(We don't need no) and we don't need no,  
blood on our hands no more

[Refrão]  
(Breakdown the wall) dividing  
(Who need fools deciding)  
(Breakdown the wall) dividing  
We'll go down fighting (breakdown the wall) [repeat]

East and West coming face to face  
Split either side, a city disgraced  
When somebody dies it adds a brick in the wall  
The bigger they are the harder they fall  
It's too tough (Tough they got what they wanted)  
It's to late now (Get what's coming)  
Stand up (Now)  
Talks not enough, we want action not words
