

Desolate Isolation

Skeletal Remains

An isolated victim
Suffering from this bacterial infectious disease
Reaching desperately for a cure
Yet no one's there to fulfill
Bodily diminished
Caused by mycobacterium leprae
Only death will ease isolation
To break this deformatting curse

Inner neurotic compulsions
Invoking a final resort
Desiring a remedy
For this repulsive adversity
Desiring a remedy
For this repulsive adversity

An inevitable fate awaits
Enduring this trauma alone
Roaming the desolate plains
His body mimics the dead
Contorted, his body remains
Limbs decay appearance obscured
Leaning towards self-immolation
Death is to be his only cure

Inner neurotic compulsions
Invoking a final resort
Desiring a remedy
For this repulsive adversity
Desiring a remedy
For this repulsive adversity
Break
Rotted beyond recognition
Labeled a leper in society
Deterioration takes its toll a walking corpse is left
To roam alone
