

Reconstructive Surgery

Skeletal Remains

Uncontrolled growth of abnormal cells in the brain
Now begin to spread
Damaged cells by developed inflammation
Causing pressure in the skull
Abnormalities in the human body
Slowly start to occur
Bringing forth this horrid and
Unnatural disease

Radiation treatment
Is brought into effect
Medical examinations
CT scans of the head

Being Exposed to Radiation
Only Leading to your corrosion
Liquid Injections, Chemo Therapy
Desperate for a solution
No known medical treatment

Coming to a conclusion
Sweaty palms grasping the handle
Chamber loaded, barrel in his mouth

Pulled the trigger cancered cells
Splattered on the floor
A suicide he tried to achieve
Came to no success
Sickness he was trying to abort
Still remains alive

A Reconstructive surgery
Physicians have accomplished
Goal to end it all for once
Assassination with no success
Cancer Rotting Corpse
Now back to radiation
Medical examinations lead
Back to self immolation
