

Nowhere Fast

Skid Row

In between the hatred and the vow, and the vow
Is the dead end that we're at right now, at right now
Love lies dying from the words we heard
Are we damned if I won't save the world?

Standing at the speed of sound
We're going under
Can't slow down so I have to crash
We're going nowhere fast
We're going nowhere fast
Going nowhere

Are we lost? How did we end up here? End up here
Crushed beneath the weight of what we fear, what we fear

Shake a broken bottle while you scream until it hurts
Treading muddied water and you're living in reverse
Paint another picture that only you can see
Then light them all on fire to set your demons free

Standing at the speed of sound
We're going under
Can't slow down so I have to crash
We're going nowhere fast
We're going nowhere fast
Going nowhere

Standing at the speed of sound
We're going under
Can't slow down so I have to crash
We're going nowhere fast
We're going nowhere fast
We're going nowhere, no
