

All This Time

Skindred

Inside my soul I've got this burning deep desire
Wanna set the world alight, inside I've got this fire
The more I look and see the more I'm getting blinder
Been trying to fool myself by walking on the wire
And now I know why

All this time I've been running around in circles
All this time, it's been going around my head
Can't blame it on the last time, no
Stilling living in the past, I know
You got the best of me, you won't get the rest of me
All this time, it's been going around my head

Can't wait to reach but I know time it is the master
Wishing your life away, recipe for disaster
The more I look and see, the more I'm getting blinder
Been trying to fool myself by walking on the wire
And now I know why

All this time I've been running around in circles
All this time, it's been going around my head
Can't blame it on the last time, no
Stilling living in the past, I know
You got the best of me, you won't get the rest of me
All this time, it's been going around my head

And now I know why

All this time I've been running around in circles
All this time, it's been going around my head
Can't blame it on the last time, no
Stilling living in the past, I know
You got the best of me, you won't get the rest of me
All this time, it's been going around my head
