

Change

Skip Marley

Change, ayy

As people fight, blindly they strike
System failing so they not taking no time
Well a one bright day, money just can't buy
All in a premeditated paradise
Let love abide and always be our guide
It starts in truth, don't let it end in lies
Why walk alone in the dark of night?
Everybody needs somebody by their side

Just love, it'll stop the pain
So just love, it puts a smile on your face
So just love, it'll save the day
When will we love and make way for a change?

Do you know love unites every race?
So just love and it can cease all strain
Yes, love makes me act a little strange
Do you know what love can do to your brain?

(It make change)
If you got love
(Ayy)
Give some away
(Change)
Today
(Ayy)

Your true desire deep down never quiet
And been suppressed for a while, it burns a brighter
I'll be a lighter wick the flame can never tire
Before we get down to the wire
I'll be your amplifier

Chemically, medically need that
You look around, only a fool don't see that
Physically, spiritually feel that
Where love goes, I'll be at

Just love, it'll stop the pain
So just love, it puts a smile on your face
So just love, makes me act a little strange
Do you know what love can do to your brain?

(It make change)
If you got love
(Ayy)
Give some away
(Change)
Today
(Ayy)

(It make change)
If you got love
(Ayy)
Give some away

(Change)

Today

(Ayy)

Time to realize we can do more than just hoping
Don't you see the chance of better which is golden
This bridge to cross hasn't been lost over the ocean
Speaking up no matter the cost, no more holdin'

Chemically, medically need that
You look around, only a fool don't see that
Physically, spiritually feel that
Where love goes, I'll be at

(It make change)

If you got love

(Ayy)

Give some away

(Change)

Today

(Ayy)

(It make change)

If you got love

(Ayy)

Give some away

(Change)

Today

(Ayy)
