

# Hell Parade

[Skip The Use](#)

Hey! Lights out! Here go! We are strong as a fuck  
That you never know  
We don't care who's coming down again  
I say come and walk with me now  
You have to follow me on this way

Many men will tell you : this this babylon way today  
You have to be true, just do it for you  
Many men will tell you : this this babylon way today  
You have to be true, just do it for you  
Hell parade  
Hell parade

Hey we are black, we are white  
We are you, we are them anybody there!  
Revolution walks all over us now  
Cause we are the dark side of the country  
What should do?  
You have to follow me on this way

Many men will tell you : this this babylon way today  
You have to be true, just do it for you  
Many men will tell you : this this babylon way today  
You have to be true, just do it for you  
Hell parade

Are we angels or devils?  
Whatever the waves, we exist by the nonsense  
Love is somewhere with the solution  
Life is a black hole, but we knew it anyway that's what  
I say  
I did not want those consequences, time is just crisis  
How to know where to go of you don't know where're you  
from  
Like a secret treasure which finally shines no more  
Looking at us truly is accepting not to be down

Many men will tell you : this this babylon way today  
You have to be true, just do it for you  
Many men will tell you : this this babylon way today  
You have to be true, just do it for you  
Hell parade
