

Wait A Minute

[Skip The Use](#)

I'm walking down this road
Thinking of another breeze
I'm starving, I need something to eat
Hidden inside my long old coat
Though nobody could know
I really need something to hide
My tears behind my smiles

Wait a minute
I've been infected
Wait a minute
I dunno your name

Hey, I know you, she said
My grey sky turn to blue
The fire in her hair has just
Completely blown me away
Something weird starts to heat all my body
Her smile is a massive weapon
I've been shot right away

Lady! Wait a minute
Lady! I've been infected
Lady! Wait a minute
Lady! I dunno your name
