

Daylight

Skizzy Mars

Whatever you did can you do it some more love?
Swear you got me falling for your ass only
Whatever you gave can I take some more love
(We don't hang out in the daylight)
Swear you got me craving you night and day

I'm gonna push you away
I'm gonna pull you back in
I don't know what I want
But I don't want it to end
You ask me questions like
What do I say to my friends
I do not know what this is
It doesn't make any sense
We just enjoying our lives
I don't have answers to all your questions but you look gorgeous tonight
Is it too late to make first impressions I'm catching side eyes
You sending shots, they in my direction but it's the right time
For you to pull up, explore a connection
Damn
And I got your makeup on my shirt
Had a camp collar, we got something that's ain't supposed to work
But you can't doubt it
I've been round the country and I searched
But I can't find it
Yeah he love you but I loved you first
Now you tryna hit me where it hurts
You keep your emotions in your purse
Right next to the cigarettes and blush
When the city silent it's just us

Whatever you did can you do it some more love?
Swear you got me falling for your ass only
(We don't hang out in the daylight)
Whatever you gave can I take some more love
Swear you got me craving you night and day
Look

Street numbers turn to letters as I pulled up at your spot
And I remember what you said try not to break your own heart
Now I'm on my third first date this month and your on my mind
You know how it gets when I mix instagram with wine
Today I meant to hit you but the sun was out
I was uptown and I drove you by your mama's house
You always call me when you out late and leaving the club
Sometimes I feel like I pull up and I'm seeking a bust
A sneaky link we only vibe at nights but nights are when I feel like me
Cause you know that in daylight we probably wouldn't say these things
Liquid courage my approach to life resorts C'est La Vie
Glen then would have me turning all my notes to maple leaves
Whatever I said you know I meant it
Whatever you did it left me senseless
You're a lot of things but mainly precious
Whatever we took it was electric
I'm still gone
Blowing up your phone are you still home

Whatever you did can you do it some more love?
Swear you got me falling for your ass only
(We don't hang out in the daylight)
Whatever you gave can I take some more love
Swear you got me craving you night and day
