

Issues

Skizzy Mars

Confession, yeah
I lied about seeing that French movie you recommended 'cause I wanted you to like me
I'm scared to show you who I am 'cause if I do and then you leave the world gets frightening
And I just played a show, make some money spend it all on clothes 'cause I'm empty
And yeah I'm feelin' good for twenty minutes but I'm right back to empty
I'm still lackin' something
You told me that we all got issues, but I know mines are worse
You told me that we all got demons, but mines be puttin' in work
I was doin' coke til seven on a Saturday, then I took my mom to church
Aye, a lot of scumbags in the bars tonight, and-

We all got issues, say it with your chest
I got issues, you've wasted nothing yet
If you saw me at my worst would you love me any less?
We all got issues, say it with your chest, say it with your chest
Say it with your chest, yeah

(Haha
You know me and Skizzy go back like the funny moment packs- you already know what it is
We back)
First off, let me make amends
For cheating on you with your friends
She look good that night
But that was low I can't admit
I take a couple hits they help me forget
All the shit I did but then you came up
Then I did a little more 'cause the game's tough
Then the whole internet was tryna flame me
All the fuckin' bullshit that they made up
Am I a addict? Probably so
I just know life is hard on my own
I be with all my friends, I be feelin' alone
And sometimes my solution is women and blow
I don't know
I got issues baby, I'm fucked up
These demons I can't run from
I can't solve 'em with these women that I run through
(So just come through)

We all got issues, say it with your chest
I got issues, you've wasted nothing yet
If you saw me at my worst would you love me any less?
We all got issues, say it with your chest, say it with your chest

I won't let you ruin your life
If you let me ruin mine
You're too bright to live on the dark side
But I bring it out
Always bring it out

I won't let you ruin your life
If you let me ruin mine
You're too bright to live on the dark side

But I bring it out
Always bring it out
