

## Say Something

Skizzy Mars

I had a girlfriend and you had a boyfriend  
And I was in New York and you were in Boston  
And time has never been on our side  
What if I see you tonight?  
You were in college and I was in rehab  
And you're drinking vodkas and I'm sipping decaf  
And I can't believe my eyes  
Running into you tonight

Say something  
I really hate the way we've been  
And I don't wanna take this shit to the grave  
I can already tell by the look on your face  
So just say something

I had my demons and you had ambitions  
And you tried to save me but I wouldn't listen  
And everything turned out alright  
Except with you and I  
I can't explain it but something is different  
It's got me remembering how much I miss ya  
And I can see it in your eyes  
Every time you lie

(One two three four)

Say something  
I really hate the way we've been  
And I don't wanna take this shit to the grave  
I can already tell by the look on your face  
So just say something  
(Won't you please say something?)

It's 2 AM, we're still out  
So tell me where we're going out  
Let's pretend we're still friends  
Without any of the benefits  
It's 2 AM, we're still out  
So tell me where we're going  
Just say something now  
Now, just say something

Say something  
I really hate the way we've been  
And I don't wanna take this shit to the grave  
I can already tell by the look on your face  
So just say something  
(Won't you please say something?)
