

You've got new friends now
Driving a Benz now
You, you got everything
That I never needed
I stayed up all night
Trying to figure out
How you got everything
That I never needed

Now it makes sense that we drift apart
No need to reply to this
I'm really happy with what I've got
No looking for sympathy

But still I get this feeling
Like I'm not really healing
You make it look so easy
Every time you're leaving

You've got new friends now
Driving a Benz now
You, you got everything
That I never needed
I stay up all night
Trying to figure out
How you got everything
That I never needed

Now I'm not jealous or anything
I'm sure you will get me wrong
Are you expecting me to believe
You're already moving on?

Cause I've still got this feeling
That you're not really healing
You make it look so easy
Now tell me what's your secret

'Cause you've got new friends now
Driving a Benz now
You, you got everything
That I never needed
I stayed up all night
Trying to figure out
How you got everything
That I never needed

Take me, I
I wouldn't mind fooling around you
Take me, I
I wouldn't mind fooling around you

You've got new friends now
Driving a Benz now
You, you got everything
That I never needed
I stayed up all night

Trying to figure out
How you get everything
And I'm only dreaming
