

# When The North Wind Blows

Skrewdriver

For far too long, we've let our enemies knock us to the floor  
No one cares to lift a hand, until the knock is on their door

(chorus)

We've gotta stop Red infiltration, in all our motherlands  
We gotta stand up for our nation  
Stop them Reds, the future lies in our hands

Cobwebs have all gathered, they now obscure the view  
Majorities are in a trance, and the fight's left to the few

(chorus)

When the north wind blows, the doubts will linger no longer  
When the north wind blows, the message makes us stronger  
When the north wind blows, the chill breeze brings us strength  
When the north wind blows, there's no more sitting on the fence

The Marxists are all crowing, they think they've won the fray  
Even rich men's governments all listen to what they say

(chorus) x2
