

Light Up

SkyDxddy

Ghost

I remember who I was
I'm not going back where I started from
Don't look back I'm gone

Ghost

I remember who I was
I'm not goin back where I started from
Don't look back I'm gone

Ghost

Light up if you understand it
Light up if you feel where I'm coming from
Light up if you understand it
Light up if you feel where I'm coming from

Don't look back
Don't fall apart
Every flaw is a work of art
Fill your cup up if you feel me
Put your blunts up if you high
Have a round of applause
For the ones with a cause just fighting to survive
This road can be so lonely
Sometimes its like why try
But we've made it this far regardless of scars
They're the way that we prove were alive
Lord knows these hoes don't feel a thing
They snort a line of coke off of anything
Popping pills like tums just to numb the pain
But girl we gonna be best buds today
And self medicate
We could all relate
J after j
I'm talkin ganja babe

I remember who I was
I'm not goin back where I started from
Don't look back I'm gone

Ghost

I remember who I was
I'm not goin back where I started from
Don't look back I'm gone

Ghost

Light up if you understand it
Light up if you feel where I'm coming from
Light up if you understand it
Light up if you feel where I'm coming from

Yo how far have we fallen
How low did we sink
I'm a female not a trophy
You're teaching young girls to be fake
Teach em to live here in reality
Teach em to have the right kind of mentality
We pride ourselves on originality
Cause that shit makes us feel free MOTHER FUCKER
So how far have we fallen
And how low did we sink

Irrelevant hoes be doin the most
They switch up before you can blink
All pain is universal
But so is feeling high
Have a round of applause
For the ones with a cause
Just fighting to survive
I'm a real ass girl
In a barbie world
And I'm face to face with plastics
Fake ass bitches come with fakes asses
Rude dudes always tryna make passes
I'm tryna take it back to the classics
I'm straight up sick of all of this whack shit

I remember who I was
I'm not goin back where I started from
Don't look back I'm gone
Ghost
Light up if you understand it
Light up if you feel where I'm coming from
Light up if you understand it
Light up if you feel where I'm coming from

Let me tell ya'll something
All pain is universal
But so is feeling high
Have a round of applause
For the ones with a cause
Just fighting to survive
The one who's love you can't just buy
