

## New Devil

Skyharbor

Time to escape, time to breathe, but to cast a shadow here  
You have come to devour every part of me  
Isolated, oscillating in a universal, constant stream  
You are the voice inside my mind and behind a hundred violent tendencies

Come to me, don't deny  
I am your new devil  
Merge with me. Be as one  
I am your new devil  
New devil

You pull me eight feet under  
The smell of sulfur is getting stronger  
I can feel it in my eyes as the parody subsides

You drag me eight feet under  
The smell of sulfur's getting stronger  
I can feel it in my eyes as the parody subsides

The air turned to ash, ash turned to stone  
Stone eroded lovingly, every eye on me was gone

Shells made of glass, tokens of love  
Memories worth caring for  
In the end they matter not

I bend time, always behind  
Forever there in the dark, you hide

Give in to me  
Die within us  
The world will never be a better place
