

Black & White Bar

Skyhooks

Let's go down to the black and white bar
Sit at the black and white tables
Drink black and white coffee, tell black and white lies
Read the black and white paper

Lets' go down to the black and white bar
Dance on the black and white marble
Get ourselves in a black and white mood
And talk that black and white garble

Let's go down to the black and white bar
And get some black and white powder
Lay some lines on the black and white girls
And turn that music louder

We all are just colour blind
But we don't mind
We've never seen a rainbow
We've never dressed in day glo

Let's go down to the black and white bar
Let's go down to the black and white bar
Let's get it right, get it down tonight
Down in the black and white, down in the black and white bar

Let's get down to the black and white bar
And spend some black and white money
Plan and scheme dream, black and white dreams
Taste some black and white honey

Let's drive on down to the black and white bar
Through Black and white streets in a Black and white car
Play black licks on a white guitar
Make it big be a black and white star

We all are just colour blind
But we don't mind
We've never seen a rainbow
We play dice and dominoes

Let's go down to the black and white bar
Let's go down to the black and white bar
Let's get it right get it down tonight
Down in the black and white, down in the black and white bar

We live on the chessboard
Make our moves from black to white
No shades of grey, no middle ground
It's night or day, left or right

Meet me down at the black and white bar
At the black and white hour
You can state your case and deal the ace
Feel the black and white power

Won't you come to the black and white bar
And watch the black and white dancers?

Let me know if it's yes or no
I deal in black and white answers

We all are just colour blind
But then we don't mind
We've never seen a rainbow
This is the world that we know

No yellow green or white or red
Not a colour in our head
We've never seen a blue sky
It's black and white and then we die

Let's go down to the black and white bar
Let's go down to the black and white bar
Let's get it right get it down tonight
Down in the black and white down in the black and white

Let's go down to the black and white bar
Let's go down to the black and white bar
Let's get it right get it down tonight
Down in the black and white, down in the black and white bar
