

## Life In The Modern World

Skyhooks

Where the sky meets the earth, that's the skyline  
Where the hair meets the head that's the hairline  
Where the needle meets the skin that's the mainline  
And where today meets tomorrow that's the deadline

You gotta use what you're given to keep on livin'  
Life in the modern world  
Don't wreck the sunshine just walk the fine line  
Life in the modern world

Where the shore meets the sea that's the shoreline  
Where the left meets the right that's the party line  
Where the print meets the page that's the headline  
And where the poor meet the street that's the breadline

You gotta use what you're given to keep on livin'  
Life in the modern world  
Keep your finger off the button  
Or there won't be nothin'  
Left of this modern world

We got pocket calculators we got cybernetic refrigerators  
We got men on the moon we got your padded room  
We got tax exiles we got sea to air missiles  
We got nuclear power we got the Catholic hour  
We got life we got death we got life and death
