

# Point In The Distance

Skyhooks

For some of us this life is too short  
When years must be lived in minutes  
And we dream of a second chance  
To love beyond our limits  
So if we don't make it this time around  
Here's what you should do  
Call me up on the laser phone  
Springtime in the year 2052

There's a point in the distance  
Where I know you'll be waiting  
At some point in the distance  
There's a hope of better days  
At some point in the distance  
There's a line of least resistance  
At some point in the distance  
We'll feel that sweet insistence

They say that distance it lends romance  
To many a situation  
But romance is in the distance  
So take me to the station  
Some of us we want to travel  
We feel that urge to roam  
And some of us are on the road  
So we can get back home

To a point in the distance  
There's a hope of better days  
To a point in the distance  
I'll meet you past the haze  
At some point in the distance  
Maybe we'll arrive  
At some point in the distance  
One day we'll make that drive

And if you're working to change the world  
But time's running out for you  
Don't give up 'cause next time around  
There'll be work for you to do  
Some people tell me they're ahead of their time  
And that's OK by me  
'Cause you and I we'll be around  
So we'll just wait and see

There's a point in the distance  
Where maybe we'll arrive  
At some point in the distance  
One day we'll make that drive

So if you can't be with ones you need  
Or they can't be with you  
Don't forget there'll be other times  
Somewhere out there in the blue  
'Cause I'll know we'll be together  
Somewhere, somehow with you  
Springtime I'm looking forward to

In the year 2052

At some point in the distance  
I know you'll be waiting  
At some point in the distance  
You can be of some assistance  
At some point in the distance  
There'll be a bright star in the sky  
Maybe on some distant planet  
There'll be a place for you and I

At some point in the distance  
At some point in the distance  
At some point in the distance  
There's a place for you and I...
