

If you wake up feeling lost and on your own
Don't let them break you down once they feel their stones
I know that it's not easy being pushed around
So come on, come on
Don't let them put you down

Stand up, If you're the one that's misunderstood
Be strong and speak your mind

If you don't wanna feel left in my shadows
You gotta learn how to win some battles
It might be hard but you gotta try
If you believe spread your wings
You're gonna fly
You're gonna fly
You're gonna fly

None of them can see you shine quite like I do
Just be who you are, nothing to prove
Don't hang your head so low
You're gonna make it through

Stand up, If you're the one that's misunderstood
Be strong and speak your mind

If you don't wanna feel left in my shadows
You gotta learn how to win some battles
It might be hard but you gotta try
If you believe spread your wings
You're gonna fly
You're gonna fly
You're gonna fly

Just a little bit longer
If you could only see
It's not gonna last forever
It will be alright
It's gonna get better, better, better

If you don't wanna feel left in my shadows
You gotta learn how to win some battles
If you don't wanna feel left in my shadows
You gotta learn how to win some battles
It might be hard but you gotta try
If you believe spread your wings
You're gonna fly
You're gonna fly
You're gonna fly
