

# You & Me

Skyzoo

I pour it out  
I pour it out  
I unzipped my heart and I pour it out

You and me were meant huh  
Do a little something together  
Figured you know  
Kick it to you in verse form  
Instead of kickin it to you in person

To start it off ma  
Am at a crossroads  
Cuz I aint sure which way that this is gonna go  
See on one hand it seems so positive  
Then on the other am lost but then the opposite  
Far from a sucker for love  
But I kinda adore you  
Knew it the minute I first saw you  
Started with a couple of plugs  
Then you started to fall through  
Couple days a week it was all you  
Then you caught feelings and I caught feelings  
We got scared like am I 'pposed to feel this  
But you and me were meant huh  
To be together in the best way  
We cant live life wondering about the next day  
But you don't how scared I am  
To let you get next to sky  
You don't know the stress that I remember  
But still in all you looking like you the best inline  
So maybe you the best to sky's contenders  
Cuz in the past when they spaz  
Sky would dip em  
And that's why I think twice when you kiss me  
At the same time any night I want you with me

(Chorus 2x)

You and me were meant huh  
To be together  
And I know you scared ma  
But aint nothing wrong  
With takin it there ma  
Am just as nervous as you  
But if anybody is worth it is  
You and me

Keep pourin it  
Keep pourin it

They say the first two weeks consist of the most smiles  
Tryna get to know your curves and profile  
And every little thing you did I took notice  
Remembering the shit that I said to get you open  
Just so I can say it again to keep you right here  
And eventually leading to your night wear  
You was playing good girl but you gave in  
I redecorated your walls and they curved in

I took care of them dreams you was servin  
Day by day by day  
Even outside the sheets we was kinda complete  
Just as long you was riding with me  
I felt something like down south cook food  
And you too you was coke check hook boo  
Lets just say we was both sprung cool  
Then we started to care a little more  
I can hear your heart beating clear when you talk  
And all the above are signs of a relationship  
And I aint even meant to take this trip

(Chorus 2x)

Keep pourin it  
Keep pourin it  
But now we known each other long enough  
But am still not sure what to call us  
Can't tell if what we feel is strong enough  
But I know when am with you its all us

(Chorus 2x)
