

# A Better World

SLANDER

Late night talks and night time walks  
Tryna fix what was broken  
Unknown roads, turn to gold  
No more words left unspoken

Ohh ohh  
Something's in the water  
We can feel it coming closer  
Ohh ohh  
Look at what we started  
It ain't over till it's over

We can build a better world, a better world  
Somewhere where the lights stay on  
If it takes a miracle, a miracle  
Just know that we will soldier on  
See all the skies are changing  
We feel the colors raining down  
We can build a better world, a better world  
A better world  
A better world

See all the skies are changing  
We feel the colors raining down  
We can build a better world, a better world  
A better world  
A better world

See all the skies are changing  
We feel the colors raining down  
We can build a better world, a better world  
A better world

The autumn rain, upon our skin  
Brought us closer together  
Autumn leaves, on empty streets  
It's the start of a chapter

Ohh ohh  
Something's in the water  
We can feel it coming closer  
Ohh ohh  
Look at what we started  
It ain't over till it's over

We can build a better world, a better world  
Somewhere where the lights stay on  
If it takes a miracle, a miracle  
Just know that we will soldier on  
See all the skies are changing

We feel the colors raining down  
We can build a better world, a better world  
A better world  
A better world

See all the skies are changing

We feel the colors raining down  
We can build a better world, a better world  
A better world  
A better world

See all the skies are changing  
We feel the colors raining down  
We can build a better world, a better world  
A better world  
A better world
