

Getting Late

SLANDER

Slowly, I feel something inside me change
It can't just be me
Faking my truth so I believe my lies
Nothing feels concrete

When did we let the time do the talking?
What will it take? How can we stop it?
It's pulling us down
How can I make you hear what I'm saying?
'Cause when there's clouds, you're already leaving
Make it all slow down

'Cause it's getting late
And I wish and I wish that maybe you would stay
Is it almost too late?
There's so much, there's so much that I want the chance to say
But it's getting late, is it too late?

Is it too late?
But it's getting late, is it too late?

I want to see
More than what the light unhides
You brought it in the night
So show me
Only what the stars can't see
There's no need to hide

When did we let the time do the talking?
What will it take? How can we stop it?
It's pulling us down
How can I make you hear what I'm saying?
'Cause when there's clouds, you're already leaving
Make it all slow down

'Cause it's getting late
And I wish and I wish that maybe you would stay
Is it almost too late?
There's so much, there's so much that I want the chance to say
But it's getting late, is it too late?

Is it too late?
But it's getting late, is it too late?

It's getting late
And I wish and I wish that maybe you would stay
Is it almost too late?
There's so much, there's so much that I want the chance to say
But it's getting late, is it too late?
