

High Voltage

SLANDER

You know just what to say
To pull me right in and then you ruin my day
And I know where to get in your head
'Cause you like to make you wish we never met

You are the light in an abandoned building
In the middle of a blackout
Swear with time it's gonna hold me different
We always burn it to the ground

Are we too high voltage
To ever fall in love
I could see this working
But it never does
Ending in destruction
We always mess it up
Even though we try and try and try
Are we too high voltage
You and I

Are we too high voltage
You and I

You and I, you and I
Are we too high voltage

Here I go falling in love
Head over heels with the potential of us
And there you go holding me back
You know I'd drop everything if you ever ask

You are the light in an abandoned building
In the middle of a blackout
Swear with time it's gonna hold me different
We always burn it to the ground

Are we too high voltage
To ever fall in love
I could see this working
But it never does
Ending in destruction
We always mess it up
Even though we try and try and try
Are we too high voltage
You and I

High voltage (You and I)
High voltage (You and I)
High voltage (You and I)
Are we too high, too high, too high
Too high, too high, too high...
Are we too high voltage?
You and I

Put your hands up

You and I, you and I

Are we too high voltage
