

## Keep U Warm

SLANDER

I know you're waiting  
Counting mistakes you ain't making  
We've all missed the train at the station  
We don't need to stop  
When we're breaking apart  
Ain't we're living for stars  
Wanna hold you  
I need you close yeah we both do  
You know whenever you hurt yeah I hurt too  
I wanna know  
Is it cold where you are  
'Cause it's cold in the dark

Cross your heart, change your mind  
I'll be there by your side  
To stop you from falling  
When the voice in your head  
Makes you learn to forget  
Who you are

I'd cross every ocean  
If your words were drowning out  
Let the sky break open  
I'd still get to you somehow  
I swear that I can take the pain  
Just to know that you will be okay  
I'd set myself on fire  
For you just to keep you warm

Woah, woah  
Woah, to keep you warm  
Woah, woah  
For you just to keep you warm  
Woah, woah  
Woah, to keep you warm  
Woah, woah  
For you just to keep you warm

Yeah I'm alright  
But I'm wishing I could pull up outside  
And then run to your door almost midnight  
We've got so much to stay  
We telling old stories  
'Til 4 in the morning

Cross your heart, change your mind  
I'll be there by your side  
To stop you from falling  
When the voice in your head  
Makes you learn to forget  
Who you are

I'd cross every ocean  
If your words were drowning out  
Let the sky break open  
I'd still get to you somehow  
I swear that I can take the pain

Just to know that you will be okay  
I'd set myself on fire  
For you just to keep you warm

Woah, woah  
Woah, to keep you warm  
Woah, woah  
For you just to keep you warm  
Woah, woah  
Woah, to keep you warm  
Woah, woah  
For you just to keep you warm
