

# Wish I Could Forget

SLANDER

I've got a problem and the problem is you  
Left me no option, I don't know what to do  
I broke your heart so you could know how it feels  
Got matchin' scars to show you that I was real  
Knew from the start that this would never exist  
But it is what it is

I wish that I could forget  
I wish that I could forget  
You took my world and flipped it upside down  
Got me so high, you left me on the ground  
I wish that I could forget  
I wish that I could forget  
You took my world and flipped it upside down  
Got me so high, you left me on the ground

I wish that I could forget  
I wish that I could forget  
You took my world and flipped it upside down  
Got me so high, you left me on the ground

I still remember when it was you and me  
Less like a memory, more like PTSD  
I burned alive to stop you catchin' a chill  
Barely survived when you went in for the kill  
Couldn't handle your part, so you tried flippin' the script  
But you shot and you missed

I wish that I could forget  
I wish that I could forget  
You took my world and flipped it upside down  
Got me so high, you left me on the ground  
I wish that I could forget  
I wish that I could forget  
You took my world and flipped it upside down  
Got me so high, you left me on the ground

I wish that I could forget  
I wish that I could forget  
You took my world and flipped it upside down  
Got me so high, you left me on the ground  
I wish that I could forget  
I wish that I could forget  
You took my world and flipped it upside down  
Got me so high, you left me on the ground

I wish that I could forget  
I wish that I could forget  
You took my world and flipped it upside down  
Got me so high, you left me on the ground
