

# Forever

Slapshock

Living in silence  
Stuck in the violence

On the other side,  
I watch it die and feel the wind blows  
You try to throw away the memories  
Of pain and sorrow

Killing is your game  
There's a bullet in your name  
Your road is far away from here  
You said you're not allowed to fear

Forever, you'll suffer  
Coz nothing last forever  
Forever, you'll suffer  
Coz nothing last forever

I wonder how it feels like to die all alone  
Watching the time as it ticks in your bone  
Knock on the door but there's nobody home  
You're waiting to die and fade away

You recognize all the dirty lies inside the system  
You pay the price using their device  
It's so addicting  
How will you forget, the way that you have lived  
The worst is yet to come, you can't hide from the sun

Forever, you'll suffer  
Coz nothing last forever  
Forever, you'll suffer  
Coz nothing last forever

I wonder how it feels like to die all alone  
Watching the time as it ticks in your bone  
Knock on the door but there's nobody home  
You're waiting to die and fade away

The time consumes you, it abuses you  
Slowly waiting for the game to end  
You close the window, turn the lights down  
Its time to rest again your weary head  
Like a stranger, on the coldest winter  
Who needs a cover, who needs a fire

I wonder how it feels like to die all alone  
Watching the time as it ticks in your bone  
Knock on the door but there's nobody home  
I wonder how it feels, i wonder how it feels  
I wonder how it feels like
