

## Get Down

Slapshock

Too many people, too many sequels repeated so many times  
But I still won't be able to put away my people's trouble  
I'm dealing with evils who think they're the kings and nobles  
To them we're like animals who get beat up  
How many times we gonna gamble

For our lives, we have to survive  
We have to take over our fears that we hide inside  
And start travellin' on a wild ride right by your side  
I will start to provide a difficult view of life  
Comin' straight from the other side

So just glide and start reminiscin'  
I'm so sick and tired of bein' a victim of everyone's criticism  
So better listen, this generation has been infested  
With a lot of wrong information  
My intention is to make you realize that we got the vision  
The new solution to this wrong manifestation is to start a revolution  
A mission to position everyone in suspended animation  
So who got the case, the case in this place  
So everybody here and now show me your face

Scream if you wanna scream  
As loud as you wanna be  
Is everybody feelin' me  
Get down baby, get down baby

Scream if you wanna scream  
As loud as you wanna be  
Is everybody feelin' me  
Get down baby, get down baby

Mind of the people travel in slow motion  
The motivation of this generation  
Has been subjected to a lot of limitation  
Elevation gives me the fear of heights, a fear that bites  
Every single night I go to sleep  
I have to see the light, ayt  
My existence stimulates your resistance  
We can walk alone, we don't need your assistance  
With perseverance we come back with a vengeance  
No need to mention, no need attention  
I feel like running from the devil in the Book of Revelation  
You said do or die kid, tonight kid  
Plant the seed, kill your greed, start to read  
As we feed those who don't believe  
To the voices with many choices  
Door closes, not giving any chances  
Like a tree with so many branches

All your tactics are complicated like mathematics  
It's automatic I speak like everyone is really hooked on phonics  
So you be amazed at how we erase  
All these people in the place now, show me your face

Scream if you wanna scream  
As loud as you wanna be

Is everybody feelin' me  
Get down baby, get down baby

Scream if you wanna scream  
As loud as you wanna be  
Is everybody feelin' me  
Get down baby, get down baby

You can never really get me out of this place  
You've got no one, you've got no one  
You can never really get me out of this place  
I've got someone, I've got someone  
You can never really get me out of this place  
You've got no one, you've got no one

Ride with me, don't you wanna take a ride with me  
Ride with me, don't you wanna take a ride with me  
Ride with me, don't you wanna take a ride with me  
Ride with me, don't you wanna take a ride with me  
Ride with me, don't you wanna take a ride with me  
Ride with me, don't you wanna take a ride with me

Scream if you wanna scream  
As loud as you wanna be  
Is everybody feelin' me  
Get down baby, get down baby

Scream if you wanna scream  
As loud as you wanna be  
Is everybody feelin' me  
Get down baby, get down baby
