Like Eskimo

Slapshock

I see your face
I miss the taste
But the way you move
I wish I could mate you
You’re my disease
I’m the victim of you
So help me please
Don’t break me
The curtain is closing
The walls come crashing down
I cant resist all the things that you do to me
Don’t use me
In your beautiful eyes
I see someone in disguise
Your eyes

You’re way too cold like an eskimo
You’re suddenly dying
You’re way too cold like an eskimo
I’m tired of defying

No
You’re killing me when you’re pretending to be with me
Leave me out
I know what you’ve done and never change at all
You said goodbye but you can’t leave behind the lies
Lead your way
I’m beginning to wonder the reason when you’re around
The reason

We stay together in your pain
We hate the things we say
Forever everyday
We must know our separate ways
The cloud has turned to haze
We’re lost inside of maze
We stay together in your fate
We hate the things we say
Forever everyday
