

# Night Owls

Slapshock

You're setting fire  
in this world that we're living in  
You're trying harder to put us down  
but we're not giving in  
All these times you've been trying to bury us alive  
We're still breathing  
We're still living  
We will never die  
You put us all in the headlines  
But it was written in bad lines

We don't care  
We're from the other side

We are not dead, like what you said  
We're just sleeping through the day  
We will survive, well never die  
Like a dark owl in the night  
We are not dead, like what you said  
We're just sleeping through the day  
We will survive, well never die  
Like a dark owl in the night

We don't care, if we suffer  
we keep coming back  
We are stronger, than you think ready to attack  
You put us all in the headlines  
But it was written in bad lines

Cause we don't care  
We're from the other side

We are not dead, like what you said  
We're just sleeping through the day  
We will survive, well never die  
Like a dark owl in the night  
We are not dead, like what you said  
We're just sleeping through the day  
We will survive, well never die  
Like a dark owl in the night

Now and forever, our dreams wont slip away  
Now and forever, it will still be the same

We are not dead, like what you said  
We're just sleeping through the day  
We will survive, well never die  
Like a dark owl in the night  
We are not dead, like what you said  
We're just sleeping through the day  
We will survive, well never die  
Like a dark owl in the night
