

Make me suffer till I get further  
I'm gettin' higher on every word you say to me  
You make me feel like I'm not addicted  
To anything, everything I breathe inside

Sit back relax I'm back with a full attack  
You keep this track fresh so you can counteract  
You penetrate my inner vision as a matter of fact  
Your lack of respect, you never ever bring it back  
One love, one soul as we take control  
This is a call to the people around the globe  
That come to shows and rock the world  
Stronger than the mighty sword

I am the voice inside your mind  
You come separate me, I'm not your kind  
Try to let your hate out and you will find  
That you got your own demon at the end of the line

Try to hear my voice on this microphone  
I will spit all the words that will crush your bone  
I am your worst nightmare, I'm inside your home  
I'm teachin' all your kids so they won't be left alone

You left me with no soul my friend  
And I'll be too damned to hurt you again  
You left me with no soul my friend  
And I'll be too damned to hurt you again

You always put me on the wrong story  
I guess I know now  
Why the hell you bring me down

Release your hate, do what you gotta do  
Prepare yourself, be strong, you gotta make it through  
I'm the one who made you scream "Fuck You!"  
I want to say it again "Fuck You!"  
Your discrimination is my motivation  
You callin' me a freak? Ohh shit that's your opinion  
I don't care and I don't play fair  
I've had enough coz you stop and stare

Reject the broken words and let me flow  
Yo! I come to show you now who got to go  
Stop talkin' behind my back, you better let me know  
So better hurry up and never say no

Try to hear my voice on this microphone  
I will spit all the words that will crush your bone  
I am your worst nightmare, I'm inside your home  
I'm teachin' all your kids so they won't be left alone

You left me with no soul my friend  
And I'll be too damned to hurt you again  
You left me with no soul my friend  
And I'll be too damned to hurt you again

You left me with no soul my friend  
And I'll be too damned to hurt you again  
You left me with no soul my friend  
And I'll be too damned to hurt you again

Again...
