

## Failed Hope

## Slaughter To Prevail

So, this is the end of my life  
And that I have so far, except that I've lost everything  
My friends, my family  
For whom I breathed  
For whom I have lived  
You're just feeling it unbearably painful  
And I feel that  
This is forever  
Mighty wild fear envelops your infinite mind  
(Infinite mind)  
Here, there is no judge  
There is no good  
There is no evil side  
(Evil side)  
Here, you cannot just remember something and start to cry  
You are everything and nothing here  
You just died!

Death on the streets  
Blood in the water  
Countless lives lost  
Another fucking slaughter  
"Where's the help?"  
All the people only pray  
All they care about is money  
But, now you're just dead!

Прозрение пришло на грани смерти  
Ты видишь всё теперь, что никогда не замечал  
Чувства обострились и нахлынул страх того  
Что ты не можешь контролировать тот хаос  
Который накопился в тебе за всю ёбаную жизнь  
Твоё эго всё ещё вопит от боли  
Ты не понимал, что всё не возьмешь с собой  
Совесть тебя грызет  
Осознанной воли нет  
Не было при жизни, чтобы так ты проиграл этот бой

The epiphany came on the verge of death  
You see everything now that you never noticed  
His senses sharpened and he felt a surge of fear.  
That you can't control this chaos  
The one that's been building up in you all your fucking life  
Your ego is still screaming in pain  
You didn't realize you couldn't take everything with you  
Your conscience is gnawing at you  
There is no conscious will  
There was no time in your life when you lost this fight like this
