

Psycho

Slaves

She rock a mood ring
Looks like a rainbow
And when she's seeing red
We go hit the same low
We make a change
Ain't nothing change though
Cause there's another storm coming
Get your raincoat

She got me caught up in my feelings
I hit the ceiling
Make up but no amount of healing
Can help me deal with
The mood swings
Can't keep it stable
Ain't no sleeping
Nah, take it off the table

Say something simple
She's finding a way to spin it
Can't imagine me winning
This argument did it
I just hit my daily limit

Psycho
There's only room for one psycho
Keep messing with me and I might go
Crazy about you babe
But I'm fucked up enough for the both of us
Won't stop running through my head
She's coming back for more
She kicked me outta bed
Just to lay me on the floor
Go crazy about you babe
But I'm fucked up enough for the both of us

Psycho
It's out of hand
But when I'm riding high I feel like the man
I'm heading for the ground
Don't understand
I'm falling with no parachute
What was the plan?

See the vibe turned icy
I wonder do you even like me?
I wanna spend every second but time's pricey
Communication's out of the question
Don't test it
Yeah we set the air on fire
Now we're stuck inside a zeppelin

Psycho
There's only room for one psycho
Keep messing with me and I might go
Crazy about you babe
But I'm fucked up enough for the both of us

Won't stop running through my head
She's coming back for more
She kicked me outta bed
Just to lay me on the floor
Go crazy about you babe
But I'm fucked up enough for the both of us
Psycho

Don't be blind-
Don't be blinded by the moment
Keep your eye-
Keep your eyes on where you're going
Don't be blind-
Don't be blinded by the moment
Keep your eye-
Keep your eyes on where you're going

Psycho
There's only room for one psycho
Keep messing with me and I might go
Crazy about you babe
But I'm fucked up enough for the both of us
Won't stop running through my head
She's coming back for more
She kicked me outta bed
Just to lay me on the floor
Go crazy about you babe
But I'm fucked up enough for the both of us
