

There's a fire, fire raging through the night  
Woke up with smoke by the shores  
Wildlife running from  
There's a fire, fire raging through the night  
Gasping in fear I don't know  
If this be a nightmare

Resting my head on her shoulders  
I hope she lives on for longer  
She still got life in her baby  
For more than a couple of years, yeah  
Don't let the flames burn you down  
Don't let the flames burn you down  
You helped me clear my mind  
And you kept my high  
All my uncertainties you took from me  
I cannot hold ya  
Wanna take you to the westside  
But I cannot move ya  
But we ain't over  
I'm used to all the cold nights now that we're older

There's a fire, fire raging through the night  
Felt like we've been here before  
Repeating the same mistakes  
There's a fire, fire raging through the night  
Woke up with smoke by the shores  
Wildlife running from  
There's a fire, fire raging through the night  
Gasping in fear I don't know  
If this be a nightmare  
(If this be a nightmare)
