

## Autumn (I Wish I Was Better)

Sleep On It

I feel my soul come alive  
When I watch the leaves die  
But I'm still turning gold  
From the glow that I saw in your eyes

Writing letters to a ghost  
Of who you once were  
I plagiarized every line  
Cause I can't remember

Now I miss every friend I never found  
Nicotine and a knack for letdowns  
I've been trying to find the words to say  
To get you back around

I never had the chance to get it right  
Woah woah, but I never tried  
I gotta find the words I wanna write  
To tell you that I'll be better next time

You felt your heart come alive  
When you watched our love die  
Now I'm left feeling cold  
From the void that you made in my life

Now I miss every friend I ever found  
Caffeine and a knack for letdowns  
I've been trying to find the words to say  
To keep you all around

I never had the chance to get it right  
Woah woah, but I never tried  
I gotta find the words I wanna write  
To tell you that I'll be better next time

Come close, I'll keep my distance  
Can't hurt people you don't let in  
I want to be something you still miss  
Oh god I wish that I was better than this.
