

# Hope

## Sleep On It

You say you wanna turn a new leaf  
But you poisoned every tree around me  
You scream about every little thing  
That you've been doing since the day you left me

I don't know  
Where to go  
Blinded by love and  
I've been lost for so long

At the end of the road  
With nowhere to go and  
I've been praying one day you'll find me  
Clinging to hope  
Begging for so much more

Than the person that you see  
And all your memories strewn behind me  
Pick up any pieces that you see  
And keep on wishing one day you'll fix me

Wasting my time here  
Hold your breath if you think that it might help  
It's clear that you're not worth holding mine

At the end of the road  
With nowhere to go and  
I've been praying one day you'll find me  
Clinging to hope  
Begging for so much more

All the light I can't see  
It's here inside of me  
I'm down on my knees  
And I've been waiting for the day that I can finally leave

I don't know  
Where to go  
Blinded by love and  
I've been lost for so long

At the end of the road  
With nowhere to go and  
I've been praying one day you'll find me  
Clinging to hope  
Begging for so much more

All the light I can't see  
It's here inside of me  
I'm down on my knees  
And I've been waiting for the day that I can finally leave
