

Another Way

Sleep Theory

I can feel it when you come around
You can say a lot but never make a sound
Even with a look I know it's going down
Save us both some time and just say it
You never let me know when something changed
You made a fool of me and I'm to blame
For thinking things could ever be the same
When you're already done

So when the bottom falls
And goes up in flames
I'll lay the past to rest
And forget your name
So when the bottom falls
My heart does the same
And I remember the words
You never had to say

You let me think that we were okay
Even though you knew that it was too late
I guess you knew that I'd get in the way
If you'd ever come out and just say it
Lookin' at me like I'm a reason to leave like I'm not anything
Listen to me, I'm not about to believe that I lost everything
If it's the end, you better know it's the end, make me a casualty
'Cause once you leave, you're dead to me

So when the bottom falls
And goes up in flames
I'll lay the past to rest
And forget your name
So when the bottom falls
My heart does the same
And I remember the words
You never had to say

If there's no more hope
If there's nothing here to save
I'll stand alone without you
I'll find another way

So when the bottom falls (When the bottom falls)
And goes up in flames (Up in flames)
I'll lay the past to rest (To rest)
And forget your name (Forget your name)
So when the bottom falls (When the bottom falls)
My heart does the same
And I remember the words (Remember the words)
You never had to say
