

## Provider

## Sleep Token

I wanna be a provider  
Garner you with silk like a spider  
Roll or die, you bet, I'm a rider  
Your outer shell, your secret insider

I wanna be a provider  
Your guiding hand  
Your final decider  
That bit of fuel to your fire  
Stoke your desire  
Just let me know that you're mine  
I wanna be a provider

I wanna be a provider  
I wanna be a provider

I want to delineate  
That the last time we were around  
Each other  
I felt myself hesitate  
But I know I would not now  
My lover

Caught up on you  
Do I wanna go there? Yes, I do  
I wanna do more than just bend the rules  
'Cause you've been hitting my phone so hard I found it  
Breathing through a tube in the ICU  
Yeah, I see you  
The only bad body spinning eyes in the room  
The only good girl in this side of the moon  
And you're the only game that I like to lose

When you look at me like that, got me falling right back  
When you look at me like that, got me falling right back

And your fingers  
Foxtrot on my skin, I'm  
Going under this time  
I can give you what you want

And our bodies converse like old friends  
Exchanging the years in silence  
With something unsaid on both ends  
Surely we know the difference

I wanna be a provider  
Garner you with silk like a spider  
Roll or die, you bet, I'm a rider  
Your outer shell, your secret insider

And your fingers  
Foxtrot on my skin, I'm  
Going under this time  
I can give you what you want

And I told you

I can get it so right  
Even in the daylight  
I can give you what you want

I can give you what you want  
I can give you what you want  
I can give you what you want
