

The Night Does Not Belong To God

Sleep Token

When you live by daylight
With angels at your side
In order now bestowed by
The light of the sunrise

And you remember everything
Only 'til the sun recedes once again

And the night comes down like heaven
The night comes down like heaven
The night comes down like heaven
The night comes down like heaven
The night comes down like heaven
The night comes down like heaven
The night comes down like heaven
The night comes down like heaven

The whites of your eyes
Turn black in the lowlight
In turning divine
We tangle endlessly
Like lovers entwined
I know for the last time
You will not be mine
So give me the night, the night, the night

The night comes down like heaven
The night comes down like heaven
The night comes down like heaven
The night comes down like heaven

The night comes down like heaven (The whites of your eyes)
The night comes down like heaven (Turn black in the lowlight)
The night comes down like heaven (In turning divine)
The night comes down like heaven (We tangle endlessly)
