Call It What It Is

Sleeperstar

The earth is filled with busy feet
Busy souls on busy streets
I feel alone, I feel alone

I'm half asleep and half awake
A slave to every breaking day
I feel alone, I feel alone

I don't think time will make this right
Let's just call it what it is
Come on, call it what it is

All I wanted was to feel your touch
To let me know that you were real
But come on, come on, that will never be

The space between us is too far to cross
So let's be honest with ourselves
So come on, come on, call it what it is

The ones I pass are so confused
My skin is gone, they walk right through
I feel alone, I feel alone

Everything we used to try
And everyone I used to find
I feel alone, I feel alone

Can you hear me?
Do you hear this?
Do you know what's going on here?

All I wanted was the rain to fall on us
While I held you in my arms
So come on, come on, just let it me

But the space between us is too far to cross
So let's be honest with ourselves
So come on, come on, just call it what it is
