

Everything Must Find Its Place

Sleeperstar

This has gotta stop
This has got to be the end
This has gotta die
We will find our end
Oh

Everything must find its place
Find someone to fill the empty space
Everything must find its place

Let it be, let it be my fault
This is you, this is me
Caught in between these cold lies
Saying oh my
Let it be, let it be my fault
This is you, this is me
Stuck in between these old lies
This is all I can take

All of this is wrong
All of this I now regret
The lonely never sleep
She's always in my head
Oh

Everything must find its place
Find someone to fill the empty space
Everything must find its place

Let it be, let it be my fault
This is you, this is me
Caught in between these cold lies
Saying oh my
Let it be, let it be my fault
This is you, this is me
Stuck in between these cold lies
This is all I can say to you

'Cause time is short
Only love will make this run on

Let it be, let it be my fault
This is you, this is me
Caught in between these cold lies
Saying oh my
Let it be, let it be my fault
This is you, this is me
Stuck in between these old lies
Saying oh my
Let it be, let it be my fault
This is you, this is me
Caught in between these cold lies
Saying oh my
