

# Lost Machines

Sleeperstar

I am a lost machine  
Everything I have has failed  
(Everything I am, everything I am)  
In these electric dreams  
I finally see what I must do  
(I am a lost machine)

I spent my whole life running hot, breaking up  
You said I'm broken, never gonna be enough  
Told me I should let you go  
This is a promise, I will go this distance  
Bend space and time to be with you  
I was meant to be with you

What am I doing here?  
Is there life in the atmosphere?  
Are we the only ones?  
Eyes fixed on a dying sun

I spent my whole life running hot, breaking up  
You said I'm broken, never gonna be enough  
Told me I should let you go  
This is a promise, I will go this distance  
Bend space and time to be with you  
I was meant to be with you

(I am a lost machine)

Come into the waves  
Passing by like wolves in the dark  
This is where I go  
Fall into the hole in my heart

I spent my whole life running hot, breaking up  
You said I'm broken, never gonna be enough  
Told me I should let you go  
This is a promise, I will go this distance  
Bend space and time to be with you  
I was meant to be with you

(I am a lost machine)  
(Everything I have has failed)
