

# Don't Get Close

Slipknot

Somebody give me some light  
And not punch in the dark  
Somebody show me the end  
And I try to push a start  
I'm trying to figure out  
A better way, a better answer  
But I keep finding all the problems  
I've been looking after

You can't wander through the world  
With nothing but a smile  
I'll take your tongue for words  
And use it to instill denial  
Don't get close  
You don't know me  
And you'll never know  
Chivalry, will get you somewhere  
Rivalry, will take you there

Don't get close  
You don't know me  
And you'll never know  
Chivalry, will get you somewhere  
Rivalry, will take you there  
Maybe I should look away  
Before I really miss  
Maybe I should pick the time  
Before I pick the place  
I bet you all the things  
That you emulate, you penalize  
But I don't wanna go  
Before you learn to finalize

Don't get close  
You don't know me  
And you'll never know  
Chivalry, will get you somewhere  
Rivalry, will take you there  
Don't get close  
You don't know me  
And you'll never know  
Chivalry, will get you somewhere  
Rivalry

You assist the plot  
My vision's overshoot  
I have the best confection  
I was gone for all the lessons  
Who coined these words I use  
Stay out and be abused  
I didn't want to be  
The undeniable source of everything

Don't get close  
Don't get close  
Don't get close  
Don't get close

Don't get close  
You'd better stay away  
Don't get close  
You'd better stay away  
Don't get close  
You'd better stay away  
Don't get close  
You'd better stay away

Need change, watching all the conflicts  
Constrict, push the fist in, squeeze it  
I can not resist, claws and fist  
Remember, remember  
You take the rivalries  
And never make much sense  
I have the worst possession  
What I want is so insensitive  
Stay out and be abused  
Cause this is so confused  
I only want to be  
Left alone, and rot away

Don't get close  
You'd better stay away  
Don't get close  
You'd better stay away  
Don't get close  
You'd better stay away
