

Listen To The Radio

Sloan

Listen to the radio
Where did everybody go?
There's silence all around the globe
I say it again
Come on in

Voices in the static fade
Riding out the echo waves
Moving in and out of phase
I say it again
Come on back

It's on my hands
I can't wash it away
It's on my hands
I can't wash it away

Listen to the radio
Signal noise ratio
The frequencies have all gone cold
Leaving me here
In the transmission swirl

No one's going to say my name
No one's going to share the blame
Nothing's going to grow again
For the rest of my life
In my new world

It's on my hands
I can't wash it away
It's on my hands
I can't wash it away
It's on my hands
It's on my hands

Listen to the radio
Where did everybody go?
There's silence all around the globe
I say it again
Come on in
