

## Song For Shae

Slowly Slowly

All the noise and then the quiet in the yard  
All the lonely in the air from your still heart  
Everybody gathers here on February 12  
To say they needed all your beauty somewhere else

The anniversary dinner at your mums  
I saw the sunlight in your hair in autumn  
Your belly laughs, your giant eyes, your best friend  
Four years old it's just too much to comprehend

Shae I didn't know you, but I feel I did somehow  
'Cause I know all of your family and they talk about you and how  
You were confident and beautiful - a shining little light  
And something tells me that you're watching over everyone tonight

The final photo in the album hits home  
Your siblings standing with your mum at your gravestone  
Well life is circles, seeds to trees that drop the fruit  
And we are just at different times inside the loop

Shae I didn't know you, but I feel I did somehow  
'Cause I know all of your family and they talk about you and how  
You were confident and beautiful - a shining little light  
And something tells me that you're watching over everyone tonight

Your niece is perfect and she looks just like you  
She is talking now and she just turned two  
Your brother, sister and your parents always say  
That there's so much of you alive in Zoe, Shae
