

simulation

Smallpools

The future is in the rear view
It's so far from what they tell you
So throw away your new TV
They're controlling what they feed me

I wish you could be here
You could ride along
And I can drive all through the night
Oh, I wish you could see it
Soon it won't be long
Late nights
We're living life in a simulation
Loving life in a simulation
We're all part of the information
Oh, I wish you could be here
Late nights

So take another dose of what you're used to
Look away from what might be true
We're poolside on this sunny night
The water's draining out so come and take a dive

I wish you could be here
You could ride along
And I can drive all through the night
Oh, I wish you could see it
Soon it won't be long
Late nights
We're living life in a simulation
Loving life in a simulation
We're all part of the information
Oh, I wish you could be here
Late nights

I wish you could be here
You could ride along
And I can drive all through the night
Oh, I wish you could see it
Soon it won't be long
Late nights
We're living life in a simulation
Loving life in a simulation
We're all part of the information
Oh, I wish you could be here
Late nights
