Smash Into Pieces

I'm on top of the charade and it's like everybody wanna be me
I'm a millionaire, a ladies man, a rocky star, I'm living the dream
I wake up in different cities, every day I overdose on repeat
Will I make it when it feels like there is no air to breathe

Nobody knows what I think what I feel
The lights go out when the pressure's unreal
I find me searching for my great escape
All that surrounds me is fake

I wanna go to the other side
They have a club where the legends never die
Cause I want everyone to know my name
And I am ready to do what it takes

To live forever in the hall of fame
In the hall of fame
In the hall of fame

I don't remember who I am, I don't remember what I love about this
I'm a shadow dirty dancing with the apocalypse

Nobody knows what I think, what I feel
The lights go out when the pressure's unreal
I find me searching for my great escape
All that surrounds me is fake

I wanna go to the other side
They have a club where the legends never die
Cause I want everyone to know my name
And I am ready to do what it takes

To live forever in the hall of fame
In the hall of fame
In the hall of fame

My time has come but this is not the end
A new beginning means goodbye my friends
I'll live forever on the other side going legendary
Making it in the hall of fame

I wanna go to the other side (other side)
They have a club where the legends never die (legends never die)
Cause I want everyone to know my name
And I am ready to do what it takes

To live forever in the hall of fame

I wanna go to the other side
They have a club where the legends never die (legends never die)
Cause I want everyone to know my name
And I am ready to do what it takes

To live forever in the hall of fame
