

# Dopamine

## Smile Empty Soul

I sat and watched as you decayed  
Then turned to walk away  
The saddest thing I've seen  
Pathetic as the human race  
Ashamed to be the same  
As all you fucking pigs

Gimme that feeling that I love  
You can be my only  
Gimme that feeling that I know so well

Dopamine to help me with the pain  
Don't wanna feel the sting no more  
Don't believe  
A word you hear me say  
I'm leading you astray  
Till something better walks in through that door

Don't ever try and get between  
Me and what I need  
So ugly when I feed  
Pathetic as a human being  
Ashamed to be the same  
And carry on the name

Gimme that feeling that I love  
You can be my only  
Gimme that feeling that I know so well

Dopamine to help me with the pain  
Don't wanna feel the sting no more  
Don't believe  
A word you hear me say  
I'm leading you astray  
Till something better walks in through that door

I'm using you  
You're using me  
We use the group  
To feed the beast

Dopamine to help me with the pain  
Don't wanna feel the sting no more  
Don't believe  
A word you hear me say  
I'm leading you astray  
Till something better walks in through that door  
Till something better walks in through that door  
Till something better walks in through that door
