

Filament

Smog

And I smle
And I smile so weakly

And the plug floats in on a barrel of water
And the plug floats in on a barrel of water

Friend goes, so does the sun
Taking any light with them

And the plug floats in on a barrel of water
And the plug floats in on a barrel of water

I'm standing up
I broke the filament with my big head
I'm standing up
I broke the filament with my big head

And the plug floats in on a barrel of water
Now the plug floats in on a barrel of water
