

Elevator

Smoke Fairies

He said he never says goodbye in elevators
He's standing in the lobby like a levitator
And I don't know how I got here anymore
I'd like to ride with you in this elevator

It goes up and down
From each floor to ground
Makes a ringing sound
What are you so scared of?
I can't sleep in Hollywood nights
I'm so fragile in these lights
I've got something to take care of

I walked out on the star lined streets
Like I'm lost in space and time
Staring at the sky like I've never seen sunshine
And when I dreamt I sank down to the ocean floor
Was lost beneath the waves in the elevator

It goes up and down
From each floor to ground
Makes a ringing sound
What are you so scared of?
I can't sleep in Hollywood nights

I'm so fragile in these lights
I've got something to take care of
I got stuck between floors
Caught in automatic doors
I got stuck between floors
Between my mind and yours

I sweated in my bed, wondering what you were thinking of
Picturing the space between the floors up above
And I am on the third and you are on the eighth
And can I come and see you before the elevator breaks?

It goes up and down
From each floor to ground
Makes a ringing sound
What are you so scared of?
I can't sleep in Hollywood nights
I'm so fragile in these lights
I've got something to take care of

I got stuck between floors
Caught in automatic doors
I got stuck between floors
Between my mind and yours
