

Sometimes We Find Love

Sniff 'n' the Tears

Didn't stop to wonder what the right thing is to do
Just tried my best to stumble on and find my own way through
The things that make you happy can also make you sad
The things you take for granted can sometimes turn out bad

Sometimes we find love - this we know is true

Looking for an outlet for dislocated dreams
You find yourself believing that nothing's what it seems
They take you to the cleaners, nothing left to say
Just hope that you can jump the moat to fight another day

Sometimes we find love - this we know is true

Outside in the distance there's a madman with a gun
You wouldn't want to get too close he'll shoot you just for fun
They say that no one valued him he thought that no one cared
Don't look at that boy funny though you will not be spared

Sometimes we find love - this we know is true

Stratified and calcified we retreat to find the soul
The promise of salvation with happiness our goal
Purged of our illusions lifeplan a busted flush
We castigate we infiltrate before it turns to mush

Sometimes we find love - this we know is true

The bellicose the bumptious tell us where we all went wrong
We put 'em up on pedestals where they think that they belong
Established and entitled to rise above the fray
With sneering contempt for those who might see another way

Sometimes we find love - this we know is true
